UNITED STATES DEPARTMENT OF AGRICULTURE  
Director of Information  
Washington

July 15, 1943

OFFICE OF INFORMATION MEMORANDUM NO. 60

Printing and Binding Allotments, Fiscal Year 1944

Following the practice of last year, the Office of Information will again make allotments of funds to the bureaus and agencies of the Department to provide for job printing and the printing of administrative instructions for the current fiscal year. These allotments will not include printing and binding for activities authorized under Public Law 45, 78th Congress (Farm Labor Act), nor those authorized under the \$25,000,000 appropriated to the War Food Administration.

The Agricultural Appropriation Act for 1944 provides the sum of \$1,200,000 for Department printing and binding, or \$100,000 less than the 1943 appropriation. Please bear in mind that it will be necessary to hold requests for funds to the minimum consistent with effective operations. Any increases over last year must be justified. The Office of Information will again retain the funds for the printing of publications. This plan provides a flexible arrangement for publication printing under wartime conditions, and has proved most satisfactory during the past year.

Any questions or problems regarding printing funds should be referred to Mr. McCormick, Executive Assistant of this Office.

Please fill out and return the attached job printing estimates form by July 31, but do not include estimates for printing out of labor funds or War Food Administration funds.

With respect to emergency field printing we have requested authority from the Joint Committee on Printing to use \$90,000 for this purpose. The usual procedure will be followed in procuring field printing and reporting expenditures therefor. If any employees who procure field printing are not familiar with this procedure they should be properly instructed. See Department Regulation No. 1355.

Keith Himebaugh  
Acting Director of Information

Attachment

1. The first part of the paper  
describes the general situation  
of the country and the  
population. It also gives  
some information about the  
climate and the soil.

2. The second part of the paper  
describes the different  
types of land and the  
different types of crops.

3. The third part of the paper  
describes the different  
types of animals and the  
different types of fish.

4. The fourth part of the paper  
describes the different  
types of minerals and the  
different types of metals.

5. The fifth part of the paper  
describes the different  
types of industries and the  
different types of commerce.

6. The sixth part of the paper  
describes the different  
types of transportation and the  
different types of communication.
